

Assigning ArcGIS Pro Named User licenses using ArcGIS Online

Log into ArcGIS Online (www.arcgis.com) using an administrator account

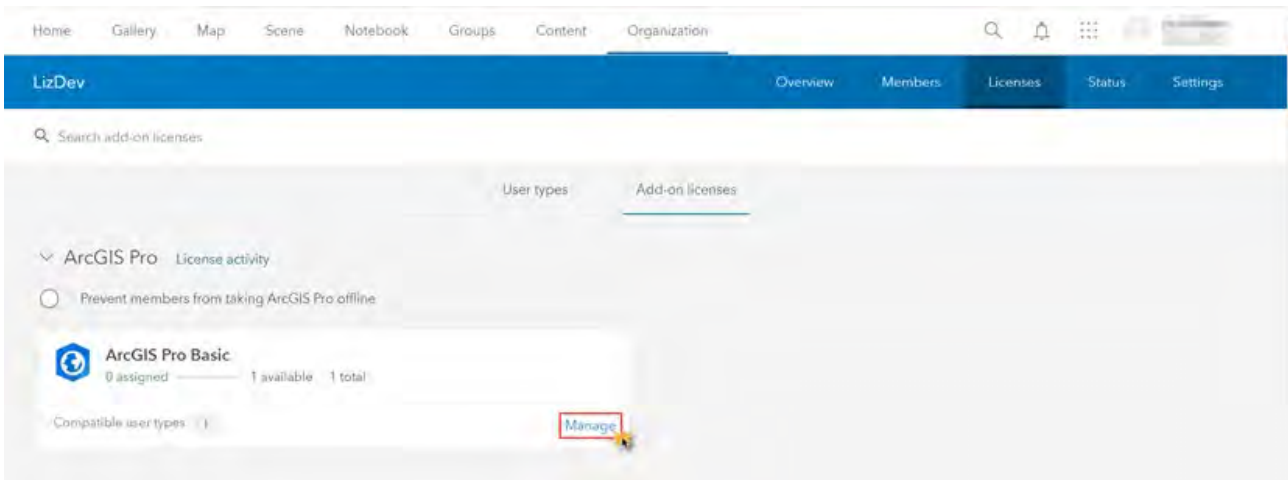

By default, you will be directed to the **Overview** on the **Organization** tab

Go to **Licenses** on the blue menu bar

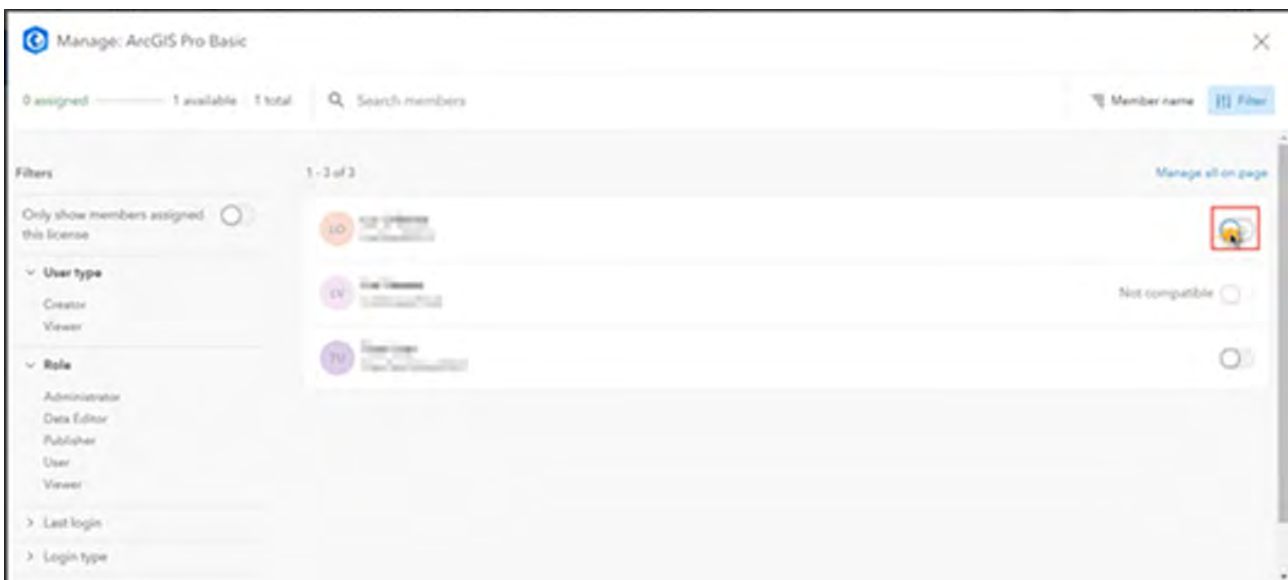

Ensure you are viewing the **Add-on licenses** section

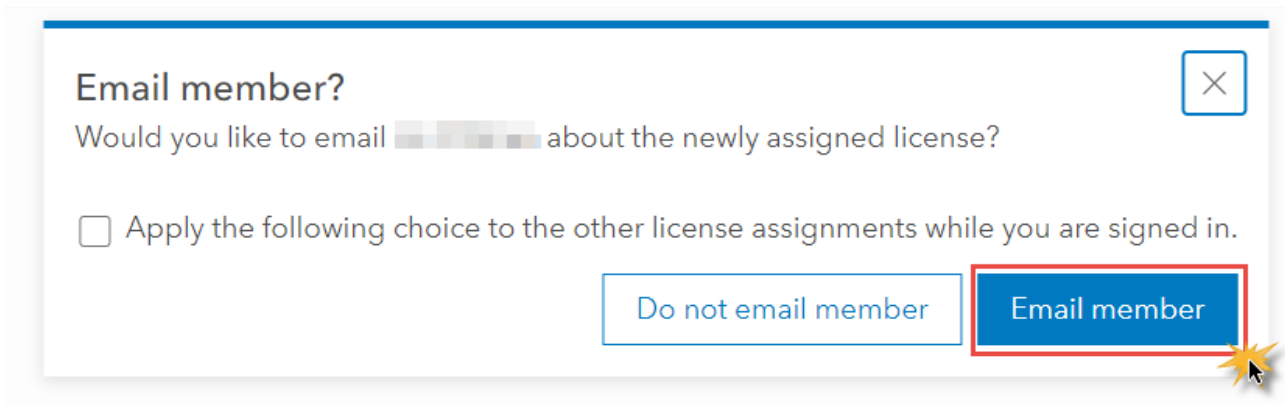

Click **Manage** on the feature you wish to update

A list of current users will appear. Select the user you are assigning the ArcGIS Pro license to

On the pop-up, choose if you would like to email the user about the new license.

Once this is done, the panel will show all license assignments.

Assigned users will be able to launch ArcGIS Pro and sign in using the ArcGIS Online log in details the license was assigned to.

You can now close the page.
